

MORBARK 48" Automatic Knife Grinder

BENEFITS

- Provides the freedom of never again waiting for knives to come back from the sharpening company.
- Specifically designed with small to medium sized operation in mind.
- Discover the convenience and cost savings of owning a Morbark knife grinder.
- Unique combination of heavy duty construction, ease of operation and affordability.

Access to the grinding wheel is simple with the removal of a couple of shields, making routine maintenance simple.

Morbark grinders feature heavy duty construction, hardened rods with linear bearing guides, adjustable ratchet and pawl system and protected wires and hoses.

These specifically designed to grind the most popular brush chipper knives. A clamping system adapts this guide to handle other knives as well.

The Morbark grinder is shown with standard knife clamp system and optional grinder stand.
